

fastening member to unscrew the fastening member from the structure, the tool being characterized in that a mandrel (38) is provided which is spring mounted within the body member and arranged to engage with the end face of the fastening member for locating the first end of the body member with respect to the end face of the fastening member.

Please delete claim 2.

Please replace claim 3 with the following:

3. (Amended) A tool according to claim 1, wherein said means to cause rotation comprises attachment means for the attachment of an operating member (44) and wherein the attachment means is located at the second end of the body member (30).

Please delete claim 4.

Please replace claim 5 with the following:

5. (Amended) A tool according to claim 3, wherein the means to cause rotation, the attachment means or the operating member comprises an impact means (44) for both imparting a blow to the tool and providing the means for rotation.

Please delete claim 6.

Please replace claims 7-9 as follows:

7. (Amended) A tool according to claim 1, wherein the means for deforming the fastening member comprises at least one cutting means (31') for biting into said end face.

8. (Amended) A tool according to claim 7, wherein the cutting means includes at least one angled cutting edge.

9. (Amended) A tool according to claim 7, wherein the cutting means comprises a blade ring (31) having blades arranged around an aperture formed in the blade ring.

Please delete claims 10-12.

Please replace claim 13 with the following:

13. (Amended) A tool according to claim 1, wherein the first end of the body member is provided with an aperture running longitudinally through the center of the body member.

Please delete claim 14.

Please replace claim 15 with the following:

15. (Amended) A tool according to claim 9, wherein the aperture enables a bolt or similar object, on which is threaded a fastening member, to be lowered into the body member such that the blades (14, 31) come into contact with an end face of said fastening member.

Please delete claims 16-18.

Please replace claim 19 with the following:

19. (Amended) A tool according to claim 1, wherein the leading end of the mandrel (38) is tapered.

Please delete claim 20.

Please replace claim 21 with the following:

21. (Amended) A tool according to claim 1, wherein the tool is provided with means (43) for preventing peripheral damage to the structure.

Please delete claims 23-26.
